

# COLLEGE INTERNSHIP MANAGEMENT SYSTEM

## Important SQL CRUD & Viva Commands

*MySQL | Quick Reference for Project Demonstration*

### 1. Select Project Database

```
USE college_internship_management_system;
```

### 2. CREATE — INSERT a New Record

```
INSERT INTO students  
(name, email, password, phone, department, gpa)  
VALUES  
('Rahul Patil', 'rahul@gmail.com', 'Rahul@123',  
'9876543210', 'Computer Engineering', 3.50);
```

### 3. READ — SELECT Records

```
-- All students  
SELECT * FROM students;  
  
-- Specific student  
SELECT * FROM students  
WHERE student_id = 1;  
  
-- Approved internships  
SELECT * FROM internships  
WHERE status = 'Approved';
```

### 4. UPDATE — Modify Existing Record

```
-- Update student phone  
UPDATE students  
SET phone = '9123456789'  
WHERE student_id = 1;  
  
-- Update student GPA  
UPDATE students  
SET gpa = 3.80  
WHERE student_id = 1;  
  
-- Update application status  
UPDATE applications  
SET status = 'Shortlisted'  
WHERE application_id = 1;
```

### 5. DELETE — Delete a Record

```
DELETE FROM students  
WHERE student_id = 1;
```

**Demo करताना actual important record delete करू नका. Test record वापरा.**

## 6. INSERT — Company & Internship

```
INSERT INTO companies
(company_name, email, phone, location, description)
VALUES
('TCS', 'tcs@gmail.com', '9876543210', 'Pune',
'IT and Software Company');

INSERT INTO internships
(company_id, title, description, domain, location,
duration_weeks, stipend, start_date, end_date, status)
VALUES
(1, 'Java Developer Intern', 'Java development internship',
'Java', 'Pune', 12, 10000,
'2026-11-01', '2027-01-24', 'Approved');
```

## 7. JOIN — Student + Internship Applications

```
SELECT
a.application_id,
s.name AS student_name,
s.email,
i.title AS internship_title,
a.status
FROM applications a
JOIN students s
ON a.student_id = s.student_id
JOIN internships i
ON a.internship_id = i.internship_id;
```

## 8. JOIN — Company + Internship

```
SELECT
c.company_name,
i.title,
i.domain,
i.location,
i.stipend
FROM internships i
JOIN companies c
ON i.company_id = c.company_id;
```

## 9. COUNT — Total Records

```
-- Total students
SELECT COUNT(*) AS total_students
FROM students;

-- Total internships
SELECT COUNT(*) AS total_internships
FROM internships;

-- Total applications
SELECT COUNT(*) AS total_applications
FROM applications;
```

## 10. WHERE — Search / Filter

```
-- Java internships
SELECT * FROM internships
WHERE domain = 'Java';

-- Pune internships
SELECT * FROM internships
WHERE location = 'Pune';

-- Stipend greater than 10000
SELECT * FROM internships
WHERE stipend > 10000;
```

## 11. ORDER BY — Sort Data

```
-- Highest stipend first
SELECT * FROM internships
ORDER BY stipend DESC;
```

```
-- Highest GPA first
SELECT * FROM students
ORDER BY gpa DESC;
```

## 12. GROUP BY — Group Records

```
-- Applications by status
SELECT status, COUNT(*) AS total
FROM applications
GROUP BY status;
```

```
-- Internships by domain
SELECT domain, COUNT(*) AS total
FROM internships
GROUP BY domain;
```

## 13. Interview Result Update

```
UPDATE interviews
SET result = 'Selected'
WHERE interview_id = 1;
```

## 14. Most Important Viva Answer

**CRUD means:**

C = CREATE / INSERT

R = READ / SELECT

U = UPDATE

D = DELETE

## 15. Quick Commands to Remember

```
INSERT → Add new record
SELECT → Read / display data
UPDATE → Change existing data
DELETE → Remove data
JOIN → Combine related tables
COUNT → Count records
WHERE → Filter records
ORDER BY → Sort records
GROUP BY → Group records
```
